Difference Between Reflection and Refraction

Steps to follow-

1. Press the Difference between Reflection and Refraction Button.

2. The camera of the phone will open after pressing the button.

3. Please hold the camera on top of the image target.

4. One dropdown menu will be visible to select the angle of incident.

5. After selecting the variable, the incident, reflected and refracted ray will be visible for observance.

反射與折射的區別

步驟:

1. 按下 " 反射與折射的區別 " 按鈕。

2. 按下按鈕後手機的相機將打開。

3. 請將相機放在圖像目標的上方。

4. 將顯示一個下拉菜單以選擇入射角。

5. 選擇變量後，入射、反射和折射光線將可見以供觀察。
